Basit Shahab

AI Automation Engineer

Sharjah, UAE | +971 52 480 9900 | basitshahab24904@gmail.com
github.com/Prawncookie | linkedin.com/in/basit-shahab

Software developer building business applications and AI-assisted document workflows. Experience spans accounting imports, product data, staff task tools and source-linked enquiry preparation, with validation, human approvals and recovery after failures.

TECHNICAL SKILLS

Development TypeScript, JavaScript, Python, SQL, React, Next.js, React Native, Node.js

Automation and AI REST APIs, webhooks, PDF/Excel processing, Anthropic, DeepSeek, Groq

Delivery PostgreSQL, Supabase, offline sync, Git, Vercel, GitHub Actions, Vitest, Playwright

EXPERIENCE

Software Developer | Lux Gear

Aug 2026 - Present

- Built a PDF/Excel-to-Zoho converter; reported entry time fell from 60 to 3-4 minutes per quotation (93-95%; estimated 187-190 hours for a 200-quotation workload).
- Implemented table-geometry parsing, AI fallback, editable previews and VAT/discount checks; verified real quotation and draft-invoice imports against source documents.
- Developed the product CMS and shared datasheet templates, plus source-linked manufacturer enquiries with original pictures, Excel/PDF exports and preparer/approver permissions.
- Built staff tasks with voice transcription, dated history, review reports and offline recovery. Produced a React Native Android alpha with automatic sync and a Firebase notification backend.
- Built initial project boards and private file storage. Analysed 225 quotation PDFs into 3,069 item rows and 1,574 source pictures, retaining revisions, units and price dates.

Also supported lighting supplier sourcing and quotation comparisons.

Software Developer | Neo Praxis

Apr 2026 - Present

Neo Praxis Software Solutions Ltd | UK incorporated Sep 2026

- Developed an internal CRM with lead pipelines, role-based access, AI-assisted email drafting and Smartlead webhooks for replies, bounces and opt-outs.
- Implemented private call-recording uploads and speech-to-text with saved processing states, explicit retries and usage limits.

FREELANCE AND INDEPENDENT PROJECTS

- Freelance websites: Photography By Alee and Heaven Hearts, with responsive pages, image-led content and enquiry/contact flows.
- Company research pipeline: Node.js discovery, website/contact enrichment, DeepSeek extraction, duplicate checks and scheduled GitHub Actions.
- AAPL Stock Predictor: educational Next.js application with TensorFlow.js inference and historical/predicted-price charts.

EDUCATION

BSc Computer Science | Lincoln University UAE

Feb 2023 - Jan 2026

Majors in Network Engineering and Cybersecurity
